

Himanshu Kumar Patra

Backend / Full Stack Engineer

Bengaluru, Karnataka | +91-7381631200 | himanshukumarpatra.dev@gmail.com
himanshukumarpatra.info | linkedin.com/in/himanshu-kumar-patra-sde | github.com/kumarbanty143

Summary

Backend-focused full-stack engineer with nearly 2 years of professional experience building production B2B applications. Experienced across React interfaces, Node.js/Express APIs, MySQL, Redis, workflow automation, billing integrations, reporting, and AI-enabled features. Currently strengthening Java and Spring Boot through a hands-on microservices learning project.

Technical Skills

Languages: JavaScript, TypeScript, SQL; working knowledge of Java
Frontend: React, Zustand, HTML, CSS, Tailwind CSS, Radix UI, Vite
Backend: Node.js, Express.js, REST APIs, Sequelize, JWT, OAuth2, Webhooks, Cron Jobs
Data & Infrastructure: MySQL, Redis, AWS EC2, AWS S3, Docker, PM2, Datadog, Git
Building with: Java 21, Spring Boot, Spring Cloud, Kafka, Eureka, OpenFeign
Integrations: Zoho Books, Gmail API, Google Calendar, OpenAI, Deepgram, Razorpay

Professional Experience

Vedak | Full Stack Developer

January 2025 - Present

Bengaluru, India

- Contribute to a 17-service Node.js/Express platform and React dashboard serving 10,000+ external and 500+ internal users, including onboarding, profiles, opportunity applications, compliance, invoicing, and payment details.
- Built the Zoho Books billing integration end to end, connecting billing requests and consultation calls with estimates, invoices, payment-status updates, and automated reminders through transactional webhooks.
- Developed dashboards and reports for activity, performance, quotas, CRM data, and expert payouts; improved reporting workflows by 80% and reduced execution time by 60% through automation, indexing, SQL optimization, and Redis caching.
- Built AI-assisted project creation that converts client emails into structured project and subproject drafts with extracted requirements, confidence indicators, and editable suggestions.
- Implemented voice-analysis and Daily Workspace workflows across React and Node.js, persisting transcripts and evaluations while coordinating daily targets, assignments, and team activity.

Selected Projects

Nexus Cloud Commerce | GitHub

Java / Spring Boot Learning Project

- Developed a tutorial-guided nine-service commerce system using Java 21, Spring Boot, Eureka, OpenFeign, Kafka, and MySQL, with synchronous APIs, asynchronous events, and independent service persistence.
- Implemented JWT security and signed Razorpay webhook handling, including duplicate-event, stale-failure, and invalid-signature regression tests; documented remaining distributed-consistency work honestly.

Splitwise MVP | GitHub

Node.js Backend Project

- Designed and tested expense-sharing APIs for unequal splits, multiple payers, deterministic rounding, balance netting, and monthly reporting using Node.js, Express, Sequelize, and SQLite.

Additional Experience

Zigbee Student Developers' Club, OUTR

June 2024 - November 2024

Full Stack Developer (Volunteer)

- Built and launched an alumni portal using React, TypeScript, Node.js, Express, and MySQL with registration, JWT authentication, profile management, and a searchable directory; coordinated the student team through launch.

Education & Achievements

Master of Computer Applications (MCA) | OUTR, CGPA: 8.9

2023 - 2025

B.Sc. Mathematics | Fakir Mohan University, CGPA: 7.9

2020 - 2023

Competitive Programming: CodeChef 4-Star (peak 1802); AIR 147 in the Coding World Cup.

Problem Solving: 500+ DSA problems across LeetCode, CodeChef, and GeeksforGeeks.
